SUBJECT: Request for an Advisory of the Program Google Expeditions and Climate Change Program in all Public and Private Schools in Bicol Region for the Academic Year 2019-2020.

Dear Sir:

Greetings of peace and prosperity!

Thank you for your favorable action on our request to allow our company, Pivot Edutainment, to introduce our programs to the different schools last school year. However, due to limited time and conflict with other school activities, our schedules have been deferred for the incoming school year.

This year, we would like to introduce our newest program offering – Google Expeditions in addition to our Climate Change Program. Google Expeditions is an immersive educational program that will allow students to explore the world through different virtual-reality and augmented-reality (AR) tours. With this, students will be able to physically get closer and see different angles of science concepts, historical places, and many others. This program consists of the following activities: Google Expeditions, Augmented Reality Exhibit, and Motion Tracking Exercise.

In this regard, we would like to request for another advisory from your good office to conduct this voluntary and non-compulsory activities in all public and private schools in Bicol Region for the Academic Year 2019-2020. Rest assured that we will comply with whatever guidelines that you will set

We will be looking forward to your positive response regarding the matter.

Thank you and more power.

Respectfully yours,

TERESITA T. NOMBRADO
Marketing Officer
09778403899/09177370618

LORELIE S. CALDITO

Climate Change

ACTIVITY 1 DIGITAL DOME THEATER

Inside our digital dome theater (7m x 5m), we will be featuring a 30-minute film entitled *Climate Change: What Future Are We Facing* in 360 degree format while one of our lecturers give an overview on what climate change really is. This discussion attempts to give a basic understanding on the causes and effects of this pressing phenomenon so the viewers could also act and respond accordingly.

ACTIVITY 2 3D FILM SHOWING

3D

This activity aims to feature the negative effects of climate change to our ecosystem. We are offering two different films, depending on the age and interests of our viewers. For the younger audience, we have *Forest Hero: Coni*, a 25-minute animation about a bee saving the environment and their community as well.

For an older audience, *Under the Sea* is a film about the effects of climate change to the underwater ecosystem, particularly the effect of ocean acidification.

ACTIVITY 3 INTERACTIVE EXHIBIT ON RENEWABLE RESOURCES

In this activity, Pivot Edutainment introduces different renewable sources of energy such as bicycle generator, hand crank generator, solar panel, wind turbine, and many others which are just some of the many things that could be used to lessen the aggravating effects of climate change. We also have other attractions such as our augmented reality boards, plasma ball, snow machine, and many others.

Google Expeditions

ACTIVITY 1 GOOGLE EXPEDITIONS VR

Google Expeditions is a virtual reality teaching tool that lets you lead or join immersive virtual trips all over the world — get up close with historical landmarks, dive underwater with sharks, even visit outer space!

Google Expeditions allows a teacher acting as a “guide” to lead classroom-sized groups of “explorers” through collections of 360° and 3D images while pointing out interesting sights along the way.

ACTIVITY 2 GOOGLE EXPEDITIONS AR

Google Expeditions AR encourages a more immersive and collaborative learning experience with the use of mobile devices to bring virtual objects into the classroom so students can see and virtually walk around 3D objects as if the objects were physically in the classroom.

ACTIVITY 3 MOTION TRACKING EXERCISE

Kinect allows people to use their bodies to play games (no controllers necessary). It uses full body motion which allows the player/s to be the controller, and feel as if they are actually in the game. Through this, students can enjoy while also promoting physical activity and social interactions.

ADVISORY No. 60 s. 2018
 November 20, 2018

(For information and appropriate action of the Schools Division Superintendents
 And other School Officials)

Astronomy and Climate Change Program: Understanding, Reducing & Adapting

1. As per request from Pivot Edutainment which is an innovative company that aims to Showcase different technology that could make learning complicated topics, particularly in the field of Science, easier and fun, this Office disseminates that the aforementioned company has developed educational programs that features Climate Change and Astronomy. Attendance will be on **VOLUNTARY BASIS ONLY**.
2. Participation of the public and private school teachers and other officials shall be subject to the no-disruption-of-classes policy as stipulated in DepEd Order No. 9, s.2005 entitled Instituting Measures to Increase Engaged Time-on-Task and Ensuring Compliance Therewith.
3. For more information, please contact Ms. Teresita T. Nombardo and Ms. Lorelie S. Caldito, Marketing Coordinators of Pivot Edutainment with mobile nos. 09778403899, 09177370618 and 09175545884.
4. Please be guided accordingly.
