**MANDATED PROGRAMS, PROJECTS AND ACTIVITIES OF THE YOUTH
FOR ENVIRONMENT IN SCHOOLS-ORGANIZATION**

A. Seed Bank and Nursery Establishment

Only seeds and seedlings coming from native, endemic or indigenous species of trees, including fruit trees, shall be collected and used for the nursery.

The YES-O is authorized to sell their excess seedlings to interested public and private entities as part of its entrepreneurial activities. The proceeds shall be used in the nursery maintenance and operation such as purchase of planting supplies and materials, including repairs, maintenance and expansion.

B. Planting, Growing and Caring for Trees

Consistent with the seed bank and nursery establishment of the YES-O, only native, endemic or indigenous species of trees, including fruit trees, shall be planted, grown and cared for. This policy hopes to restore our endangered biodiversity and to provide carbon sinks to mitigate the effects of global warming and climate change.

C. Awareness Campaigns and Symposia on Environmental Issues and Actions

Global warming, climate change, water conservation, power and energy conservation, waste disposal and management, watershed protection, deforestation, fire prevention, disaster risk management, greening programs, and health-related concerns (such as dengue, malaria, sanitation and pollution) among other environmental issues and actions shall be the theme/topics for discussion.

D. Outreach Programs

The YES-O shall conduct outreach programs in nearby communities such as coastal and road cleanups, mangrove tree planting and many others.

Environmental concepts, principles and best practices may also be shared and discussed with community members, opinion leaders and other concerned parties in furthering the efforts to better their environment.

1. Clean-Up Drives

Cleanup drives in coastal areas, lakes and rivers in coordination with the barangay, municipality or city where the school is situated shall be held regularly by the YES-O. Schools situated in upland and fishing areas should be specifically taught more about sustainable forest management and fishing practices respectively.

2. Adopt/Develop a Forest

The YES-O shall identify an area to be adopted/developed as forest and planted with native, endemic and indigenous species of trees, including fruit trees.

201

3. Adopt a River

The YES-O shall adopt a river in their locality which they can rehabilitate and/or protect from abuse and misuse.

4. Adopt a Community

The YES-O shall adopt the community where its school is located. It shall assist the community in developing the environmental awareness and action of its members.

E. Waste Management Program (Segregation, Recycling and Entrepreneurship)

All YES-Os shall ensure that school entrances, exits, and strategic corners must be placed with waste storage bins labeled appropriately for CANS, PAPERS, BOTTLES/CONTAINERS, STYROFOAM, ETC. These waste storage bins must be kept dry for the materials to be useful. An arrangement must be made with organizations or institutions in the locality for the entrepreneurial part of this program. A Materials Recovery Facility (MRF), where usable and recyclable wastes are processed and stored, may be established in every school if possible.

F. Plastic Free Environment

To further reduce wastes and hasten the collection and segregation process in schools, the YES-O in cooperation with the canteen staff and concessionaires are directed to reduce, if not totally eliminate, the use of disposable plastic materials.

They shall also enjoin the school and their respective communities to make plastic-free commitments and utilize reusable containers instead of single-use plastics and disposable materials. The program should teach about the toxic impacts of plastic debris that flood our waterways and threaten marine life.

G. Watershed Protection and Conservation

Where applicable, YES-O environmental activities should include and prioritize identification of watershed areas, reinvigoration of the said areas through planting and growing of native, endemic and indigenous tree species, including fruit trees, and protection through awareness campaigns with nearby communities.

H. Energy, Water and Power Supply Conservation

The YES-Os must ensure that the school community uses energy, water and power supply efficiently. The use of alternative, cost-efficient and innovative approaches must be considered at all times.

1. Rainwater Harvesting

YES-Os shall establish rainwater harvesting facility in the school which will ensure the availability of water using innovative approaches. Collected water shall be used in the maintenance of the school nurseries and in the cleaning of school facilities.

I. Fire Prevention and Disaster Risk Reduction and Management

Periodic drills that serve to prepare the school community for fires and other disasters shall be initiated by the YES-O.

J. Promotion of Local Ecotourism Sites

In partnership with academic experts in environmental protection and nature-based tour operators, the YES-O shall discover, promote and safeguard potential tourist destinations in their locales as part of its entrepreneurial activities.

K. Environmental Camps
